Ministry of Labour, Immigration, Training and Skills Development
777 Bay Street
Toronto, ON

Dear Hiring Manager,

As an ambitious Front-End Web Developer, I believe the knowledge I have of the front-end aspect of web(HTML, JavaScript, CSS) and strong will to learn more about the back-end would make me a suitable candidate for the position. I am certain I would make a strong addition to your team and this would be an ideal opportunity for me to step up in my career.

I am currently working as a co-op student at Government of Ontario as a automation tester and have studied and familiarized myself with the layouts and qualities of a good web page. I am also enrolled in Computer Programming and Analysis program in Seneca College where I have practiced and worked on number of web and database projects both individually and as a team. I have also dedicated time to work on multiple personal web projects aside from school to always improve myself. I have thorough knowledge and understanding of the importance of web accessibility and skills to implement them, to assist people with disabilities so that everyone can easily navigate the web. I am a person with a great attention to detail, constantly researching/exploring for different ways for problem solving with an open mind. I possess strong organization and time management skills, and I take my responsibilities seriously.

It would be an honour to work as a member of your team and I strongly believe I can contribute towards your goals with my ongoing desire to constantly improve and grow professionally. I have attached my resume for your consideration, and greatly appreciate your time in reading this letter. You can reach me at jennlee1550@gmail.com, and I look forward to discussing my qualifications with you in more detail.

Sincerely,

Sangin Lee
